## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Siniaguine et al. in view of Ciovacco et al. (2004/0124494). Siniaguine et al. disclose bonding a supporting layer (310) to a first surface of a semiconductor wafer on which a semiconductor element is formed; forming a groove in the semiconductor wafer by etching a second surface of the semiconductor wafer (210), the second surface being opposite to the first surface; and rounding a corner of the groove by etching the second surface (figures 9-11 and paragraphs 0043-0048). Siniaguine et al. fails to disclose rounding of the corner groove by a second etching of the semiconductor surface. However Ciovacco et al. disclose rounding of the corner groove by a second etching of the semiconductor surface (paragraph 0007). Therefore it would have been obvious to one of ordinary skill in the art to combine the teachings of Siniaguine and Ciovacco because the corner rounding increases the space available for active areas and the likelihood of crystallographic defects is reduced (see Ciovacco et al. paragraph 0006).

### ***Allowable Subject Matter***

Claim 17 is allowed.

Art Unit: 2891

Claims 4, 6, 7, 10 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or suggest wet etching to form the grooves and round the corners (claims 4, 6, 7, and 10) bonding the semiconductor to a glass substrate (claim 18) and forming second insulation on the rounded corners (claim 17).

### ***Response to Arguments***

Applicant's arguments with respect to claim 3 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2891

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
